PROJECTS

Cashex Website Development (https://cashex-website.vercel.app)
Developed the website for Cashex, a campus-based pre-ordering and payment solution. Focusing on the home and contact pages, ensuring responsive design and usability across devices.
- Automated the contact form integration with Google Sheets using Google Apps Script.

Contributed to optimizing the website for performance and deployment on Vercel.
Technologies used: HTML, CSS, JS, Tailwind CSS, React.js, Google Apps Script

Music Website Development (Freelance) (https://music-website-beta-livid.vercel.app/)
I developed a feature-rich music website with key sections .After logging in, users can access and download PDFs and audio files from the past 5 years, all organized for an enhanced user experience.
- Automated the contact form integration with Google Sheets using Google Apps Script.

Contributed to optimizing the website for performance and deployment on Vercel.
Technologies used: HTML, CSS, Tailwind CSS, JS, Next.js, Google Apps Script

WORK EXPERIENCE
